

# Simplifying Shared Folder Management

## About STEALTHbits

STEALTHbits Technologies, Inc. provides a rich set of solutions to help manage your Microsoft infrastructure and beyond. As an industry leader in Auditing, Reporting, and Compliance software, solutions from STEALTHbits increase efficiencies, reduce downtime, and optimize the performance of your systems and applications to provide instant value and the quickest return on investment.

## StealthAUDIT

StealthAUDIT is a lightweight, high speed and agent less tool. Using Data Collectors, information is returned on nearly every attribute with respect to Windows servers, workstations, Active Directory, Exchange, and more.

To ensure maximum flexibility, results are stored in Microsoft SQL Server and a built in report writing engine enables the information to be delivered in a variety of formats; email, published, Excel, or XML.

Instant alerting is provided by tracking critical threshold via the change and conformance module, and analysis will provide email notification any time such changes have taken place.

Rich historical data collection endows our customers with powerful trending and statistical capabilities.

StealthAUDIT is a powerful tool which comes packaged with pre-built solutions in Active Directory, Backup Validation, Compliance, Entitlement, Exchange, Investigation, Public Folder, Software Inventory, and much more!

## Overview

Shared folder management seems very simple on the surface: you create a shared folder, assign a group of users associated to a department or project, and the users take over posting items to them. Users will call the helpdesk to be added when needed.

It's not uncommon for medium and large-sized organizations to have several hundred thousand folders that consume gigabytes to terabytes of space on your network storage devices. Most organizations have deferred getting a handle on Shared Folders over the past decade. After years of unchecked growth, both storage requirements and the cost to manage them have risen significantly. Many organizations are also beginning to launch Identity & Access Management programs, and with this comes the need to run ownership recertification and entitlement reviews on who has access to what data.

In anticipation, many organizations have chosen to adopt new web-based collaborative applications to share information. Whether your organization is planning to archive, retire, migrate, review owners and members, or just intend to do some cleanup on the terabytes of data being consumed, StealthAUDIT can help you simplify a very complex objective.

Where we help:

- Identify Data Access & Effective Permissions
- Establish Comprehensive Clean up Campaigns
- Establish Owner Re-certification & Entitlement Reviews
- Track changes to Access and File systems
- Provide Capacity planning and Trending Reports

New enhancements to StealthAUDIT, provides you with the capability to audit Shared Folder locations across both Microsoft Windows and NetApp Filer applications. Our out-of-the box Solution Set gives you everything you need to get started with your initiative in only a few short hours. Charts and graphs of the data provide various levels of detail that position you to launch into action and summarize project progress.
